DRAFT

Introduction

The European Union (EU) and the world face a series of profound and rapid changes including in the areas of climate, the digital transition, and geopolitics. The COVID-19 pandemic and the war in Ukraine are causing unique health, social and economic challenges with a pressing urgency for action. The crises have spurred researchers, entrepreneurs, industry, public authorities and institutions, civil society organisations, and people across the globe into close cooperation to identify and co-develop innovative solutions and achieve post-pandemic stability. More than ever in recent history, collaboration for innovative solutions is necessary for social and economic recovery, environmental sustainability and resilience.

The European Innovation Ecosystems work programme aims to create and expand more connected, inclusive and efficient innovation ecosystems¹ that support the scaling of companies and spur innovation to address important challenges in a responsible way, as laid out in the New European Innovation Agenda².

The work programme contains actions under two (2) destinations: CONNECT and INNOVSMES.

- The actions in the CONNECT destination focus on building interconnected, inclusive innovation ecosystems across the EU by drawing on the existing strengths of national, regional and local ecosystems and encouraging the involvement of all actors and territories to reinforce network connectivity for sustainably business growth and to set, undertake, and achieve collective ambitions towards challenges for the benefit of society, including green, digital, and social transitions and the New European Innovation Agenda. Several calls of the destination will support the flagship action on *accelerating and strengthening innovation in European Innovation Ecosystems across the EU and addressing the innovation divide* under the New European Innovation Agenda³.
- The action in the INNOVSMES destination will support the European Partnership on Innovative Small and Medium-sized Enterprises (SMEs), which will help innovative SMEs to increase their research and innovation (R&I) capacity and productivity and successfully embed in global value chains and new markets.

In addition, it contains a number of other actions supporting the policy and programme goals of European Innovation Ecosystems.

This work programme contributes to all key strategic orientations and impact areas of Horizon Europe⁴ and to increasing innovation cohesion. It also works in complementarity with the

¹ Definition as per Article 2(47) of the [Horizon Europe Regulation](#).

² [A New European Innovation Agenda COM\(2022\) 332 final](#).

³ See the call topic „Implementing co-funded action plans for connected regional innovation valleys” in this Work Programme part. Amendments to this topic or further actions aiming at supporting the *accelerating and strengthening innovation in European Innovation Ecosystems across the EU and addressing the innovation divide* flagship are envisaged to be published as an amendment to this Work Programme part in 2024.

⁴ [Horizon Europe Strategic plan 2021-2024](#).

*Horizon Europe - Work Programme 2023-2024
European Innovation Ecosystems (EIE)*

European Innovation Council (EIC), the European Institute of Innovation and Technology (EIT), including the Knowledge and Innovation Communities (KICs) and the Regional Innovation Scheme, the “Widening participation and strengthening the European Research Area” work programme and other innovative activities across Horizon Europe, the Interregional Innovation Investments (I3) instrument (European Regional Development Fund) under Cohesion Policy and the regional Smart Specialisation Strategies, Euroclusters under the Single Market Programme, the Digital Europe Programme, Start-up Villages⁵ as part of the Long-term Vision for Rural Areas⁶, and the EU Partnerships for Regional Innovation⁷, as well as other relevant funding and policy initiatives at EU, national, regional and local level, such as the Enterprise Europe Network.

At the policy level, the EIC Forum will continue to work in a flexible manner to foster enabling framework conditions and flows of information, knowledge, talent and best practices among actors of innovation ecosystems and the EIC, to fully harness the potential of innovation. It aims at promoting a coherent and inclusive approach to EU innovation ecosystems’ policy and instruments and, as such, will operate in complement to the actions in this work programme.

The National Contact Points for the European Innovation Ecosystems work programme are supported under the EIC work programme.

Proposals are invited against the following two (2) destinations:

⁵ https://joint-research-centre.ec.europa.eu/jrc-news/start-villages-commitment-long-term-vision-rural-areas-2022-04-12_en

⁶ [Long-term vision for the EU’s Rural areas](#) (COM(2021)345 final).

⁷ <https://s3platform.jrc.ec.europa.eu/pri>

Destination: CONNECT - Interconnected Innovation Ecosystems

The urgent challenges of today are inherently complex and systemic and will not be solved by individual actors or territories in isolation. To foster enabling innovation ecosystems across the European Union (EU) requires a systemic approach that is inclusive and collaborative, involves diverse actors, institutions and places, maximises the value of innovation to all, and ensures equitable diffusion of its benefits.

As highlighted in the Commission Communication on a New European Innovation Agenda⁸, by increasing the inclusion and interconnection of less represented regions and actors into a more strongly integrated European ecosystem, the EU can capitalise on the experience, needs, vision and perceptions of an increasingly diverse range of people, companies and places. In doing so, it can also take forward a uniquely inclusive European model that is sustainable, guards against substantial labour market and wage gaps, and associated threats to territorial and social cohesion.

Moreover, such well-connected and diverse ecosystems provide innovative companies with the necessary support and conditions to thrive, i.e. through additional capabilities, data, customers, knowledge, and talents. Network connectivity within and between innovation ecosystems greatly contributes to sustainable business growth with high societal value. Therefore, the actions of this destination aim at strengthening and expanding cooperation between innovation players to better support the next generation of innovative companies whose solutions will lead the shift towards a more competitive EU and a more sustainable, inclusive, and resilient world.

Besides stronger innovation performance, increased competitive sustainability, and more rapid transitions to a green and digital society, ecosystem integration can provide ecosystem actors and companies with access to new resource, markets, customers, and contribute to disruptive strategies and innovative solutions. By being actively engaged in their local, national and European networks, companies can increase their overall growth potential.

This destination offers a holistic package of actions that:

- Foster more efficient, inclusive, gender diverse, and connected innovation ecosystems, via co-creation, co-planning and co-investments around European strategic priority areas to foster innovation deployment and to allow bringing ideas into the market and enable innovation to be scaled up at EU level;
- Ensure the inclusion of all key innovation players from across the quadruple helix⁹, and all EU territories, including rural areas¹⁰;
- Mobilise policies, funding instruments (EU, national, and regional) and fostering synergies between them;

⁸ [A New European Innovation Agenda, COM\(2022\) 332 final](#)

⁹ A model of cooperation between industry, academia, civil society and public authorities, with a strong emphasis on citizens and their needs.

¹⁰ [Long-term vision for the EU's Rural areas\(COM\(2021\)345 final.](#)

- Improve public and private buyers' capacity to define their needs and identify innovative suppliers who could effectively address those and improve Small and Medium-sized Enterprises' (SMEs) response to buyers' needs;
- Improve the connection of individual innovators with other ecosystem actors and innovation support providers;
- Ensure openness and cross-fertilisation of the innovation ecosystem within and beyond the EU's borders.

In particular, the actions under this destination should promote the creation of links:

- With all key innovation stakeholders, including the private sector, in particular between SMEs, start-ups and other innovators, including social innovators with investors, industry and public and/or private buyers for faster access to funds and markets and the public sector including authorities in charge of national, regional or local innovation policies and programmes and bodies responsible for smart specialisation strategies; also between SMEs, start-ups and foundations, civil society organisations, citizens, and individual inventors; with universities and research and technology organisations (RTOs) as sources of innovation and talent, to ensure that the innovations match the needs, values, and expectations of society, thereby accelerating deployment and up-take towards tackling societal challenges, and, if applicable, from innovation actors from rural innovation ecosystems (such as start-up villages¹¹);
- Among 'innovation leaders' and 'strong innovators' with 'moderate' and 'emerging innovators'¹² across the EU and Associated Countries¹³ to increase innovation cohesion¹⁴;
- With networks such as National Contact Points, Partnerships for Regional Innovation (PRIs¹⁵), the European Institute of Innovation and Technology (EIT), Knowledge and Innovation Communities (KICs), and European Innovation Council (EIC) communities, the Enterprise Europe Network (EEN), clusters and Euroclusters, European university alliances, Missions, pan-European platforms such as Startup Europe, public and private regional or local innovation actors, in particular incubators and innovation hubs (e.g. European Research Area hubs and Digital Innovation Hubs), that could be interconnected to favour partnering among innovators.

The applicants should consider and actively seek synergies with, and where appropriate possibilities for further funding from other relevant EU, national and/or regional innovation

¹¹ [Startup Village Forum – Startup Village Forum \(eustartupvillageforum.eu\)](https://eustartupvillageforum.eu)

¹² References: [Regional Innovation Scoreboard \(RIS\)](#), [European Innovation Scoreboard \(EIS\)](#), [Global Innovation Index \(GII\)](#).

¹³ Associated countries are described in General Annex B.

¹⁴ The work programme will act in complementarity with the “Widening participation and strengthening the European Research Area” work programme

¹⁵ <https://s3platform.jrc.ec.europa.eu/PRI>

*Horizon Europe - Work Programme 2023-2024
European Innovation Ecosystems (EIE)*

programmes, including Cohesion policy funds, the Recovery and Resilience Fund, other public and private funds or financial instruments.

Expected impact

Proposals for topics under this destination should set out a credible pathway to strengthening robust interconnected innovation ecosystems and creating a favourable environment to promote the scalability potential of businesses, and more specifically to one or several of the following impacts:

- Interconnected, inclusive, and more efficient innovation ecosystems across the EU that draw on the existing strengths of European, national, regional, and local ecosystems and engage new, less well-represented stakeholders and less advanced innovation territories, including rural areas, to set, undertake, and achieve collective ambitions towards challenges for the benefit of society, including green, digital, and social transitions, and advancing the European Research Area and the New European Innovation Agenda;
- Enhance cross-border network connectivity of local innovation hubs/pockets of excellence by reinforcing their capacity to support existing and emerging innovator countries and/or regions and their companies and the creation, reshoring, and renewing of European value chains towards the sustainable twin transition and the EU's strategic autonomy;
- Strengthen and expand cooperation between innovation ecosystems worldwide;
- Foster more inclusive and gender equal innovation ecosystems;
- Reducing territorial inequalities in access to innovation support.

The following call(s) in this work programme contribute to this destination:

Call	Budgets (EUR million)		Deadline(s)
	2023	2024	
HORIZON-EIE-2023-CONNECT-01	21.00		23 Mar 2023

Overall indicative budget	29.00	35.50	

Call - Interconnected Innovation Ecosystems (2023)

HORIZON-EIE-2023-CONNECT-01

Conditions for the Call

Indicative budget(s)¹⁶

Topics	Type of Action	Budgets (EUR million)	Expected EU contribution per project (EUR million) ¹⁷	Indicative number of projects expected to be funded
		2023		
Opening: 12 Jan 2023 Deadline(s): 23 Mar 2023				
HORIZON-EIE-2023-CONNECT-01-01	CSA	15.00	Around 15.00	1
HORIZON-EIE-2023-CONNECT-01-02	CSA	6.00	Around 0.50	12
Overall indicative budget		21.00		

General conditions relating to this call	
<i>Admissibility conditions</i>	The conditions are described in General Annex A.
<i>Eligibility conditions</i>	The conditions are described in General Annex B.
<i>Financial and operational capacity and exclusion</i>	The criteria are described in General Annex C.
<i>Award criteria</i>	The criteria are described in General Annex D.

¹⁶ The Director-General responsible for the call may decide to open the call up to one month prior to or after the envisaged date(s) of opening.
The Director-General responsible may delay the deadline(s) by up to two months.
All deadlines are at 17.00.00 Brussels local time.
The budget amounts are subject to the availability of the appropriations provided for in the general budget of the Union for years 2023 and 2024.

¹⁷ Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.

**Horizon Europe - Work Programme 2023-2024
European Innovation Ecosystems (EIE)**

<i>Documents</i>	The documents are described in General Annex E.
<i>Procedure</i>	The procedure is described in General Annex F.
<i>Legal and financial set-up of the Grant Agreements</i>	The rules are described in General Annex G.

Proposals are invited against the following topic(s):

HORIZON-EIE-2023-CONNECT-01-01: Organisation of Women TechEU 2023-2024

Specific conditions	
<i>Expected EU contribution per project</i>	The Commission estimates that an EU contribution of around EUR 15.00 million would allow these outcomes to be addressed appropriately. Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.
<i>Indicative budget</i>	The total indicative budget for the topic is EUR 15.00 million.
<i>Type of Action</i>	Coordination and Support Actions
<i>Eligibility conditions</i>	<p>The conditions are described in General Annex B. The following exceptions apply:</p> <p>The following additional eligibility criteria apply:</p> <p>This action requires the participation of at least three (3) independent legal entities, of which at least one (1) is established in a 'moderate' or 'emerging' innovator region and at least one (1) in a 'strong' or 'innovation leader' innovator region.</p> <p>The Regional Innovation Scoreboard is taken as a reference, and in the case of entities representing national authorities, the European Innovation Scoreboard. The applicants must use as a reference the latest version of the documents mentioned above at the time of the call closure. Associated Countries which are not included in the European Innovation Scoreboard and are ranked below 25 on the latest Global Innovation Index are considered as 'moderate' or 'emerging' innovators. In cases of Associated Countries not included in any of the previously mentioned references, the participation rank of the country in the Horizon Europe programme (H2020 country profile) will be taken as a reference and countries ranked below the average will be considered as 'moderate' or 'emerging' innovators.</p>

*Horizon Europe - Work Programme 2023-2024
European Innovation Ecosystems (EIE)*

<i>Procedure</i>	<p>The procedure is described in General Annex F. The following exceptions apply:</p> <p>The granting authority can fund a maximum of one project.</p>
<i>Legal and financial set-up of the Grant Agreements</i>	<p>The rules are described in General Annex G. The following exceptions apply:</p> <p>The beneficiary must provide financial support to third parties. The support to third parties can only be provided in the form of grants.</p> <p>The maximum amount to be granted to each third party is EUR 75 000, as previously determined in the decision authorising the use of financing not linked to costs for the Women TechEU actions under the Horizon Europe Programme (2021-2027).</p> <p>The beneficiary must allocate at least 75% of the total proposed budget to financial support to third parties.</p> <p>The beneficiary must respect the conditions that third parties must meet in order to be eligible for financial support to third parties under this action, as outlined in the scope of the topic.</p>

Expected Outcome: Project results are expected to contribute to the following expected outcomes:

- Support deep tech innovation as a basis for a modern, knowledge-driven, resource-efficient and competitive economy;
- Promote female leadership in the deep tech industry to build fairer, more inclusive, and more prosperous innovation ecosystems in the European Union (EU);
- Ensure a smooth continuation of the Women TechEU scheme consistent with previous processes, outcomes, and branding;
- Foster cooperation and networking between women entrepreneurs in the deep tech field.

Scope: The Women TechEU scheme has been launched under the European Innovation Ecosystems (EIE) Work Programme 2021 as a pilot scheme and became a fully-fledged initiative under the EIE Work Programme 2022.

The scheme supports European early-stage deep tech¹⁸ start-ups, registered and established in an EU Member State or [Horizon Europe](#) Associated Country for at least six months at the time of the submission, founded or co-founded by women, holding a top management position (chief executive officer (CEO), chief technology officer (CTO), chief scientific officer (CSO), or

¹⁸ Deep tech is technology that is based on cutting-edge scientific advances and discoveries and is characterised by the need to stay at the technological forefront by constant interaction with new ideas and results from the lab. Deep tech is distinct from ‘high tech’ which tends to refer only to R&D intensity.

equivalent). All deep tech domains should be eligible, with the emphasis being on overall gender balance and the position held by women in the start-up. The consortium selected under this call must ensure that these criteria are met for financial support to third parties.

The initiative complements activities funded under the EIC, paving the way for the participation of women-led start-ups in future European Innovation Council (EIC) calls.

The consortium selected under this call is expected to organise the Women TechEU scheme, covering the following activities:

- Ensure the sound design, organisation, and management of the Women TechEU scheme, ensuring continuity of the scheme as implemented by the European Innovation Council and SMEs Executive Agency in 2021 and 2022;
- Ensure smooth connection with the EIC Business Acceleration Services (BAS)¹⁹ for the mentoring and coaching support activities to selected applicants;
- Communicate and promote the scheme in order to secure quality applications;
- Organise landmark events, building a network of Women TechEU grantees, and help them to connect with the overall EIC community;
- Promote cooperation and networking activities among the community of women entrepreneurs in the deep tech field;
- Ensure proper geographical distribution and technological areas to be covered by the scheme;
- Report on the implementation of the scheme (key data on applications, start-ups funded, demographics of end-beneficiaries of the scheme, etc.) to Commission services.

The applicants should consider a project duration of two (2) years and support provided by the consortium to eligible third parties under this initiative must be made up of the following components:

- financial support to the company as an individual grant of EUR 75 000 supporting activities such as evaluating and refining products/services, design, user experience, upgrading the business model, updating the business plan and growth strategy, finding partners and investors, market validation, etc.;
- the possibility to participate in dedicated activities organised by InvestEU and the Enterprise Europe Network (EEN);
- Please note that mentoring and coaching will be provided by the EIC BAS, under the ‘Women Leadership Programme’, which includes dedicated networking and pitching events funded under a separate EIC budget.

¹⁹ https://eic.ec.europa.eu/eic-funding-opportunities/business-acceleration-services_en

Type and range of activities

A main activity of the consortium will be to run calls for proposals (at least one (1) per calendar year, the consideration of multiple cut-off dates is encouraged), organise the evaluation process, and administer the grants. Beyond providing funding to women-led deep tech start-ups, proposals under this topic should include a sound promotion and communication strategy of the programme (especially in underrepresented Member States), clearly brand the scheme as an EU initiative, including but not limited to, through information and dissemination events, press and outreach events, or roadshows.

HORIZON-EIE-2023-CONNECT-01-02: Preparatory action for setting up joint programmes among innovation ecosystems actors

Specific conditions	
<i>Expected EU contribution per project</i>	The Commission estimates that an EU contribution of around EUR 0.50 million would allow these outcomes to be addressed appropriately. Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.
<i>Indicative budget</i>	The total indicative budget for the topic is EUR 6.00 million.
<i>Type of Action</i>	Coordination and Support Actions
<i>Legal and financial set-up of the Grant Agreements</i>	The rules are described in General Annex G. The following exceptions apply: Eligible costs will take the form of a lump sum as defined in the Decision of 7 July 2021 authorising the use of lump sum contributions under the Horizon Europe Programme – the Framework Programme for Research and Innovation (2021-2027) – and in actions under the Research and Training Programme of the European Atomic Energy Community (2021-2025). ²⁰ .

Expected Outcome: Project results are expected to contribute to all of the following expected outcomes:

- Open dialogue, prepare the ground and facilitate the agreement among Member States, Associated Countries and their regions, in cooperation with the private sector and research and innovation actors, towards more dynamic, inclusive, gender diverse, and connected innovation ecosystems, via co-creation, co-planning, and co-investments around promising areas of joint and European interest;

²⁰ This [decision](https://ec.europa.eu/info/funding-tenders/opportunities/docs/2021-2027/horizon/guidance/ls-decision_he_en.pdf) is available on the Funding and Tenders Portal, in the reference documents section for Horizon Europe, under ‘Simplified costs decisions’ or through this link: https://ec.europa.eu/info/funding-tenders/opportunities/docs/2021-2027/horizon/guidance/ls-decision_he_en.pdf

- Prepare joint long-term programmes and action plans fostering collaboration, common innovation-support activities, and the creation of common knowledge assets among EU, national, regional and/or local level innovation ecosystems, enhancing synergies and complementarities of their policies and programmes and encouraging the alignment of their innovation agendas and related policies impacting innovation in line with the new European Innovation Agenda²¹;
- Ensure the inclusion of all key innovation players from across the quadruple helix²², and all EU territories, including rural areas;
- Foster synergies with other EU funding programmes, including Cohesion instruments, the Recovery and Resilience Facility, and any other funding leverages, including national or regional public funds, to complement Horizon Europe support for innovation ecosystems.

Scope: Target group(s): National, regional and/or local authorities together with private actors, including public-owned enterprises, and research and innovation actors or networks.

The topic will allow national, regional and/or local authorities in charge of innovation policies and programmes from Member States, Associated Countries and/or regions, in cooperation with research and innovation actors, to prepare joint multi-annual programmes of activities and action plans with the aim of strengthening the performance and capacity of their innovation ecosystems, their efficient interconnection and their alignment towards EU-level priorities, in line with the new European Innovation Agenda²³, to jointly tackle challenges at EU, national, regional, and local level.

The topic will allow applicants to prepare and agree on a common programme of activities and action plans; the applicants are encouraged to consider a project duration of up to 18 months and in their proposals they should:

- Identify areas and activities of cooperation to improve the efficiency and performance of the EU's innovation ecosystems, fostering their interconnection and scale-up while tackling EU, national, regional and/or local challenges:
 - o The proposals may focus on a thematic/technological area of common interest and innovation priorities with an EU added-value, and/or around one or more EU priorities;
 - o The proposals are encouraged to contribute to one or more EU priorities and challenges, including climate action, green deal and digital transformation, and should pay attention to gender equality objectives²⁴;

²¹ [A New European Innovation Agenda, COM\(2022\) 332 final](#)

²² A model of cooperation between industry, academia, civil society and public authorities, with a strong emphasis on citizens and their needs.

²³ [A New European Innovation Agenda, COM\(2022\) 332 final](#)

²⁴ See for instance the [Horizon Europe regulation](#) for horizontal gender equality principles, the [ERA policy agenda 2022-2024](#), and the [Gender Equality Strategy 2020-2025](#).

- Plan their long-term commitment: the applicants are encouraged to consider planning commitments of at least three (3) years towards engaging in the joint cooperation activities set out in the frame of the projects;
- Explain the potential for growth and competitiveness foreseen in the targeted sector and/or expected impact on EU challenge(s) through the proposed cooperation;
- Ensure inclusiveness and diversity with the involvement of all innovation actors, including individual inventors, enhance complementarities of EU, national and/or regional funds and programmes, and encourage the alignment of their innovation agendas;
- Provide a justification on the need for those joint activities that should be scalable at European level and demonstrate their strong EU added value;
- Explain how the proposed action plans complement and reinforce their national and/or regional and/or local innovation plans, policies and/or strategies in synergy, including with their smart specialisation strategies, and if applicable their Partnerships for Regional Innovation²⁵ and start-up villages²⁶;
- Explain the process that they plan to follow, with an open, clear, realistic, and impact-oriented approach, including relevant guidance mechanisms and tools;
- Present what common knowledge assets are expected from the proposed action plans, and the benefit of the intended beneficiaries of the plans;
- Present the targeted milestones to be achieved.

The proposals for the development of a joint long-term action plan may include the following two (2) phases:

- A first phase to foster close dialogue among key stakeholders for strategy/partnership building, mapping, and analysis of existing national and/or regional and/or local innovation agendas/strategies/policies/plans/activities, including local pockets of excellence/innovation hubs, the relevant active/inactive actors (including financial actors, citizens, and individual innovators) and ways to motivate their inclusion, identification of areas of competitive advantage for sustainable economic growth, mapping of gaps, needs, and opportunities. Any activities are encouraged to consider existing tools, knowledge and expertise, including the methodology and governance tools tested and developed in the context of the Partnerships for Regional Innovation initiative. Responsible Research and Innovation expertise may also be relevant in this regard²⁷;

²⁵ <https://s3platform.jrc.ec.europa.eu/pri>

²⁶ https://joint-research-centre.ec.europa.eu/jrc-news/start-villages-commitment-long-term-vision-rural-areas-2022-04-12_en

²⁷ E.g. projects supported under SwafS-14-2018-2019-2020 in Horizon 2020.

*Horizon Europe - Work Programme 2023-2024
European Innovation Ecosystems (EIE)*

- A second phase dedicated to the concretising, setting up, and finalising the joint action plan(s) and allocation of the activities over a period of the proposed action plans.

The implementation of the proposed action plans is not part of this topic. For the implementation part, the successful proposals under the topic may seek further financial support from other EU programmes, including Horizon Europe and/or other public and/or private programmes.

	in the Horizon Europe programme (H2020 country profile) will be taken as a reference and countries ranked below the average will be considered as ‘moderate’ or ‘emerging’ innovators.
<i>Legal and financial set-up of the Grant Agreements</i>	The rules are described in General Annex G. The following exceptions apply: Eligible costs will take the form of a lump sum as defined in the Decision of 7 July 2021 authorising the use of lump sum contributions under the Horizon Europe Programme – the Framework Programme for Research and Innovation (2021-2027) – and in actions under the Research and Training Programme of the European Atomic Energy Community (2021-2025). ³⁰ .

Expected Outcome: Project results are expected to contribute to all of the following expected outcomes:

- Increase knowledge on experimentation frameworks for testing innovations;
- Identify areas where the removal of regulatory barriers will facilitate the innovation process;
- Provide services for testing innovative solutions leading to technology upscaling, reducing cost, accelerating time to the market, and reducing investment risk;
- Enhance knowledge sharing and development of best practices between stakeholders that have been actively engaged in testing and experimentation processes;
- Facilitate the deployment and potential commercialisation of new innovative solutions;
- Identify areas where the multi-sectoral and/or emerging nature of some innovations requires coordinated action by innovators and regulators;
- Identify legal, regulatory, fiscal, technical, and operational pre-requisites or barriers for different use-cases which hamper the development of innovation;
- Explore areas where the European supervisory authority exists, and pan-European testing might be desirable.

Scope: *Target group(s): Innovators, research and technological organisations, national and regional authorities, Small and Medium-sized Enterprises (SMEs), start-ups, regulators and other government bodies, non-government organisations (NGOs) and other civil society organisations.*

³⁰ This [decision](#) is available on the Funding and Tenders Portal, in the reference documents section for Horizon Europe, under ‘Simplified costs decisions’ or through this link: https://ec.europa.eu/info/funding-tenders/opportunities/docs/2021-2027/horizon/guidance/ls-decision_he_en.pdf

Regulation creates the essential conditions that enable innovation to thrive, providing a general framework for finance and funding, intellectual property rights, rules for competition, and consumer protection. However, sometimes regulation lags behind technological development, leading to situations where disruptive technologies could potentially render regulations obsolete, or perceived as a barrier that hampers the deployment of emerging technologies.

Due to this complex relationship between regulation and innovation, which varies on a case-by-case basis, it is important to ensure that disruptive innovations are tested in close cooperation not only with regulatory actors, but also end-users themselves. This would allow innovators to receive societal feedback before potential mass deployment and regulators to create a flexible framework that takes into account the evolving nature of disruptive technologies.

In line with the new European Innovation Agenda³¹, it is acknowledged that the framework conditions including regulations can drive or thwart the development and uptake of innovative new products and processes. To that extent, regulatory frameworks that facilitate experimentation by innovators and enable learning and adaptation by regulators appear to be essential in order to nurture breakthrough innovations. Moreover, it would be substantial to gain knowledge from distinct approaches taken forward across European Union (EU) Member States in order to clarify options at the disposal of innovators and regulators, to facilitate such experimentation.

This action will support projects which will identify an area where innovative technologies emerge, aiming to specify if experimentation in this area is essential to facilitate the development of the technology. Moreover, the beneficiaries will closely cooperate with innovators who have identified fields where the deployment of innovation is hampered. Specifically, this action will attempt to identify areas where:

- Innovative ideas are under development but are hampered by existing regulations;
- Innovative ideas are under development in areas which remain unregulated;
- Innovative ideas need to be tested in a physical or virtual environment in order to be trialled in real- or near-real world conditions to assess their market viability.

This action is expected to support policy makers in their aim to enable, promote and support transformative innovation and by utilising the different experimentation frameworks/spaces (such as regulatory sandboxes, living labs, and test beds), and recognise what could be implemented or not.

After the identification of the area and technology for experimentation, each consortium will put forward an action plan aiming to set up an experimentation space to examine the potential of a particular innovative solution. This could be possibly linked to smart specialisation strategies as well. The action plan will also articulate which experimentation framework is

³¹ [A New European Innovation Agenda, COM\(2022\) 332 final.](#)

considered the most appropriate to address the possible challenges in relation to the identified technology.

As a final step, each consortium will set up the experimentation space proposed in the action plan. The development of the experimentation space would lead to the identification of potential legal, regulatory, fiscal, technical and operational pre-requisites or barriers helping policy makers to foster further innovation.

The proposals should focus on the following activities:

- The identification of areas and the presentation of concrete topics where experimentation could facilitate the deployment of disruptive technologies by establishing a regulatory sandbox, living lab or, test bed;
- Awareness-raising and enhanced knowledge on the existing experimentation frameworks for testing innovation;
- Identify and scale up best examples on the implementation of regulatory sandboxes, living labs, and test beds;
- Interconnect innovators with organisations which set up and promote experimentation infrastructures;
- An action plan which will elaborate on how to implement a regulatory sandbox or living lab or test bed in order to examine the potential of an emerging technology;
- Creation or utilisation of networking and coordination structures and tools to facilitate innovation development and access to and sharing of best practices, resources, talents, markets, expertise, services and knowledge, including open and collaborative knowledge bases and common knowledge assets (methods, data, processes);
- Establishment of an experimentation space in the identified priority area which will provide a technology assessment base line for future developments of the technology being tested;
- Clarify the usage of existing and the assignment of newly created intellectual property rights.

HORIZON-EIE-2023-CONNECT-02-02: Specialist Advisory Services to build capacities on innovation procurement

Specific conditions	
<i>Expected EU contribution per project</i>	The Commission estimates that an EU contribution of around EUR 1.00 million would allow these outcomes to be addressed appropriately. Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.

*Horizon Europe - Work Programme 2023-2024
European Innovation Ecosystems (EIE)*

<i>Indicative budget</i>	The total indicative budget for the topic is EUR 4.00 million.
<i>Type of Action</i>	Coordination and Support Actions
<i>Legal and financial set-up of the Grant Agreements</i>	The rules are described in General Annex G. The following exceptions apply: Eligible costs will take the form of a lump sum as defined in the Decision of 7 July 2021 authorising the use of lump sum contributions under the Horizon Europe Programme – the Framework Programme for Research and Innovation (2021-2027) – and in actions under the Research and Training Programme of the European Atomic Energy Community (2021-2025). ³² .

Expected Outcome: Project results are expected to contribute to all of the following expected outcomes:

- Promote opportunities that innovation procurement opens for public procurers;
- Enhance the familiarity with innovation procurement processes which could lead to the establishment of long-term and sustainable innovation procurement strategies;
- Further engagement of the public procurers’ community with Small and Medium-sized Enterprises (SMEs), start-ups, incubators, accelerators, and research institutions in driving innovation demand and detecting innovative solutions;
- Contribute to a cultural change in public buyers’ perception for adopting risk-averse innovative solutions;
- Stimulate SME’s response to public buyers’ needs and challenges aiming at decreasing potential uncertainties;
- Improve the procurers’ capacity to communicate their needs and identify innovative suppliers who could effectively address them;
- Deploy public and private partners’ collaboration in the co-design processes to match their needs and identify existing technologies that could result in procurement of innovation.

Scope: *Target group(s): Public and private procurers, public-owned enterprises, SMEs and start-ups, research and technological organisations, innovation agencies and other public bodies responsible for promoting innovation procurement, the European Institute of Innovation and Technology (EIT) and its Knowledge and Innovation Communities (KICs).*

³² This [decision](https://ec.europa.eu/info/funding-tenders/opportunities/docs/2021-2027/horizon/guidance/ls-decision_he_en.pdf) is available on the Funding and Tenders Portal, in the reference documents section for Horizon Europe, under ‘Simplified costs decisions’ or through this link: https://ec.europa.eu/info/funding-tenders/opportunities/docs/2021-2027/horizon/guidance/ls-decision_he_en.pdf

Despite the legal reforms and incentives in the area of public procurement of innovative solutions, this field is still characterised by a risk-averse approach. In some Member States and Associated countries, the use of innovation procurement is slowly gaining pace, but other administrations still resist the use of a more innovation-attuned approach, which recognises that there are different possible solutions to problems they are facing, rather than just the incumbent technology or process. The strategic potential of innovation procurement is immense, especially in supporting technological development in and by the public sector. Companies, and particularly SMEs and mid-caps, depend on sales to the public sector or just consider this opportunity can be motivating to innovate and adopt new technologies through public demand.

This action will support innovation procurement specialist advisory services that will act as the intermediary between public procurers and innovative suppliers, bridging those gaps that hamper the progress in the integration of innovative solutions in the public sector. With the innovation procurement specialist advisory services, it is expected to overcome the fragmentation and dispersion of public procurement across the EU enhancing the coordination on procuring innovative solutions within Member States and Associated Countries.

The innovation procurement specialist advisory services are expected to have several main competencies which will help them achieve their goals:

- Specialised knowledge on one or more market sector(s) and increased awareness of the national, regional, or local innovative start-ups and SMEs which are active in their sector/sectors of specialisation;
- Strong awareness of market opportunities that exist in their sectors of expertise, namely relevant competitions and calls which are open or planned at a national, regional, and local level;
- Good understanding of both what public procurers demand, but also what innovative suppliers could provide;
- Good technical background on their sectors, being in the position to assess the technical solutions proposed and the potential implications which could emerge from the implementation of an innovative solution. This way, the innovation procurement specialist advisory services would explain to the public buyers the function of the proposed innovative solutions and clarify technical aspects which could negatively affect their risk perception;
- Thorough knowledge of relevant procurement procedures. Consequently, the advisory services will be able to provide clarity in the legal framework for both public buyers and suppliers and eliminate uncertainties that could emerge;
- Strong knowledge of and good connections to innovative SMEs and the start-up environment, including the European Innovation Council (EIC) and the European Institute of Innovation & Technology (EIT), as well as other EU and national networks (European Enterprise Network, Startup Europe, etc.).

The innovation procurement specialist advisory services are expected to facilitate the essential change of culture of the public procurers regarding the adoption of innovative solutions by diminishing their resistance to change and risk-averse perceptions. To that extent, it is expected to reverse the slow uptake of innovation procurement practices for buying innovative solutions over traditional ones, and to spur the underpinning research and innovation activities by SMEs, start-ups, and industry providers enabling innovation (research and development (R&D)) services and outcomes of innovation process to enter the market. The innovation procurement specialist advisory services are expected to strengthen the interaction of public procurers with small innovative companies by providing practical knowledge and eliminating the perception that procurement is limited to a legal and administrative process.

The specialist advisory services participating in this process should also set up new expert networks by sharing best practices among them, regardless of where an initiative took place. To that extent, besides the increase of knowledge and awareness, there is good potential for creating synergies. The proposals should focus on the following activities:

- Awareness-raising and enhanced knowledge on innovation procurement legal frameworks for public procurers and evaluators of innovative procurement;
- Enhanced innovation knowledge and skills in procurers, raising awareness about co-design process between SMEs and procurers (public and private) that may help to discover the most up-to-date innovative technological solutions, and assist in their development and further acquisition;
- Scale up examples of best practice on the definition of needs and design of procedures and long-term strategies in the field of innovation procurement;
- Create more structured cooperation between the ecosystems of procurers and financial investors for innovation procurements.

Call - Interconnected Innovation Ecosystems (2024.1)

HORIZON-EIE-2024-CONNECT-01

Conditions for the Call

Indicative budget(s)³³

Topics	Type of Action	Budgets (EUR million)	Expected EU contribution per project	Indicative number of

³³ The Director-General responsible for the call may decide to open the call up to one month prior to or after the envisaged date(s) of opening.
The Director-General responsible may delay the deadline(s) by up to two months.
All deadlines are at 17.00.00 Brussels local time.
The budget amounts are subject to the availability of the appropriations provided for in the general budget of the Union for years 2023 and 2024.

**Horizon Europe - Work Programme 2023-2024
European Innovation Ecosystems (EIE)**

		2024	(EUR million) ³⁴	projects expected to be funded
Opening: 11 Jan 2024 Deadline(s): 21 Mar 2024				
HORIZON-EIE-2024-CONNECT-01-01	CSA	12.00	1.50 to 2.00	6
HORIZON-EIE-2024-CONNECT-01-02	CSA	2.50	Around 2.50	1
HORIZON-EIE-2024-CONNECT-01-03	CSA	4.00	Around 0.50	8
Overall indicative budget		18.50		

General conditions relating to this call	
<i>Admissibility conditions</i>	The conditions are described in General Annex A.
<i>Eligibility conditions</i>	The conditions are described in General Annex B.
<i>Financial and operational capacity and exclusion</i>	The criteria are described in General Annex C.
<i>Award criteria</i>	The criteria are described in General Annex D.
<i>Documents</i>	The documents are described in General Annex E.
<i>Procedure</i>	The procedure is described in General Annex F.
<i>Legal and financial set-up of the Grant Agreements</i>	The rules are described in General Annex G.

Proposals are invited against the following topic(s):

HORIZON-EIE-2024-CONNECT-01-01: Startup Europe

Specific conditions

³⁴ Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.

*Horizon Europe - Work Programme 2023-2024
European Innovation Ecosystems (EIE)*

<i>Expected EU contribution per project</i>	The Commission estimates that an EU contribution of between EUR 1.50 and 2.00 million would allow these outcomes to be addressed appropriately. Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.
<i>Indicative budget</i>	The total indicative budget for the topic is EUR 12.00 million.
<i>Type of Action</i>	Coordination and Support Actions
<i>Eligibility conditions</i>	<p>The conditions are described in General Annex B. The following exceptions apply:</p> <p>The following additional eligibility criteria apply:</p> <p>At least 50% of the beneficiaries in a consortium come from 'modest' or 'emerging' innovator countries or regions.</p> <p>The Regional Innovation Scoreboard is taken as a reference, and in the case of entities representing national authorities, the European Innovation Scoreboard. The applicants must use as a reference the latest version of the documents mentioned above at the time of the call closure. Associated Countries which are not included in the European Innovation Scoreboard and are ranked below 25 on the Global Innovation Index 2021 are considered as 'moderate' or 'emerging' innovators. In cases of Associated Countries not included in any of the previously mentioned references, the participation rank of the country in the Horizon Europe programme (H2020 country profile) will be taken as a reference and countries ranked below the average will be considered as 'moderate' or 'emerging' innovators.</p>
<i>Legal and financial set-up of the Grant Agreements</i>	<p>The rules are described in General Annex G. The following exceptions apply:</p> <p>Beneficiaries may provide financial support to third parties. The support to third parties can only be provided in the form of grants. The maximum amount to be granted to each third party is EUR 60 000.</p> <p>Applicants opting for this non-compulsory financial support scheme must allocate at least 60% of the total proposed budget to financial support to third parties.</p>

Expected Outcome: Project results are expected to contribute to the following expected outcomes:

- Increasing the market footprint of European start-ups in strategic digital technologies and deep tech ³⁵ innovation, notably Artificial Intelligence, Advanced Computing, Cybersecurity, Next Generation Internet, Blockchain, Internet of Things, Metaverse, Energy, Greentech, AgriTech, and Fintech;
- Better connection of start-ups, including European Institute of Innovation and Technology (EIT) and European Innovation Council (EIC)-supported start-ups and Seal of Excellence holders, to relevant local and/or European ecosystems, communities, and potential new markets;
- A scaling up of capabilities in matching technology solutions developed by highly innovative European Union (EU)-funded digital and deep tech start-ups with investment and growth opportunities in collaboration with other initiatives such as: the EIC, the EIT and the Knowledge and Innovation Communities (KICs), InvestEU, the Digital Europe Programme, Women TechEU, public and private buyers, or investors and corporate innovation ventures, and start-up villages.

In pursuit of the above outcomes the projects are expected to prioritise:

- Start-ups that have either already achieved market-product fit or have raised at least a round of financing (seed or later); and
- Start-ups established in ‘moderate’ or ‘emerging’ innovator countries and/or regions; or
- Women-led start-ups³⁶.

Scope: Target group(s): Start-up ecosystem builders, business angel organisations, venture capital entities, accelerators, incubators, start-up associations, clusters.

This action will connect local digital and deep tech start-up ecosystems and support cross-border acceleration activities for start-ups that demonstrate traction (i.e. market-product fit or at least a seed round raised). Among the start-up ecosystems to be connected, specific attention will be given to the inclusion of ecosystems in ‘moderate’ or ‘emerging’ innovator countries and/or regions.

While cross-border acceleration activities are open to all European start-ups demonstrating traction, the action will also target scale-ups identified in Horizon Europe (e.g. through the EIC (including the EIC Scaleup 100 action) and EIT-supported companies) and the Digital Europe Programme (e.g. from European Digital Innovation Hubs), and the use of Innovation Radar intelligence³⁷ and other relevant data sets. Targeting of start-ups funded by National

³⁵ Deep tech is technology that is based on cutting-edge scientific advances and discoveries and is characterised by the need to stay at the technological forefront by constant interaction with new ideas and results from the lab. Deep tech is distinct from ‘high tech’ which tends to refer only to R&D intensity

³⁶ Start-ups founded, or co-founded by women, holding a top management position (chief executive officer (CEO), chief technology officer (CTO), or chief scientific officer (CSO) or equivalent).

³⁷ <https://www.innoradar.eu/> (Actions can also have Application Programming Interface (API) access to the Innovation Radar data sets).

Programmes, particularly those part of “Plug-in” certified programmes (see [EIC Work Programme 2022](#) Annex 5) should also be considered.

In terms of outreach and amplification, actions should be publicised where relevant in the EIC Community³⁸ and should actively engage with activities and events of the Europe Startup Nations Alliance³⁹. Special attention will be given to support European digital and deep tech start-ups and scale-ups in accessing innovation procurement opportunities (public or corporate procurers).

The action may be implemented through financial support to third parties or directly by the consortium partners to allow start-ups to best benefit from the services described above. For consortia opting for the financial support to third parties scheme, the monitoring of the support to third parties provided for each action, as well as the management of the financial support to third parties, will be ensured by the coordinator.

The applicants should put in place proper communication and publicity of the actions engaged.

HORIZON-EIE-2024-CONNECT-01-02: The African Union-European Union Innovation Platform

Specific conditions	
<i>Expected EU contribution per project</i>	The Commission estimates that an EU contribution of around EUR 2.50 million would allow these outcomes to be addressed appropriately. Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.
<i>Indicative budget</i>	The total indicative budget for the topic is EUR 2.50 million.
<i>Type of Action</i>	Coordination and Support Actions
<i>Eligibility conditions</i>	<p>The conditions are described in General Annex B. The following exceptions apply:</p> <p>The following additional eligibility criteria apply:</p> <p>Legal entities established in all African Union member states⁴⁰ may exceptionally participate in this Coordination and Support Action as a beneficiary (or affiliated entity). Due to the scope of this topic, all African Union member states are exceptionally eligible for Union funding.</p> <p>Consortia must have at least three (3) independent legal entities from different African Union member states.</p>

³⁸ <https://eic.eisma.eu/community/>

³⁹ <https://digital-strategy.ec.europa.eu/en/news/new-european-alliance-accelerate-startups-growth>

⁴⁰ In the context of the conditions for this call topic, "African Union member states" includes countries whose membership has been temporarily suspended.

<i>Procedure</i>	The procedure is described in General Annex F. The following exceptions apply: The granting authority can fund a maximum of one project.
------------------	---

Expected Outcome: Strengthening Research and Innovation (R&I) cooperation between the African Union (AU) and the European Union (EU) is a key priority of the EU Communication Towards a comprehensive Strategy with Africa⁴¹, in which the role of R&I is recognised as a driver for sustainable and inclusive economic growth and job generation, thereby reducing poverty and inequalities. The first R&I Ministerial meeting of the AU-EU High-Level Policy Dialogue on Science, Technology and Innovation (HLPD on STI) agreed to focus cooperation in four priority areas: Public Health, Green transition, Innovation & Technology, and Capacities for Science, and also agreed to the development of a joint AU-EU Innovation Agenda, which is currently under preparation, and expected to be adopted at the second AU-EU R&I Ministerial in early 2023.

This topic contributes to the priority areas of action (number 9) listed in the Council Conclusions on the Future Governance European Research Area⁴² with regard to launching a pilot initiative on the Team Europe approach for a specific world region and/or topic.

This topic is also in support of the key actions mentioned in the Council Conclusions on the Global approach to Research and Innovation - the EU's strategy for international cooperation in changing world⁴³, in particular at point twenty-nine related to the AU-EU Partnership, aiming at developing a joint EU-AU Research and Innovation Agenda in support of building research capacities and translating research outputs, including those from the 'Africa Initiative' under the Horizon Europe Work Programmes 2021-2022, into socio-economic and environmental benefits, in line with the agreement reached at the 2020 EU-AU R&I Ministerial meeting.

The action funded under this topic will have the objective of supporting the implementation of the AU-EU Innovation Agenda. The action is expected to bring together a mix of EU and AU innovation stakeholders, from academia and business, including higher education establishments, public and private research entities, non-governmental organisations, international finance institutions, incubators and accelerators, technology transfer and capacity building and higher learning organisations.

The aim of the topic will be to foster the links and networks between innovation stakeholders from the AU and EU innovation ecosystems, also including the social innovation dimension.

Proposals addressing this topic should in particular contribute to the following outcomes:

- Support the implementation of the AU-EU Innovation Agenda by providing for a convening platform enabling the elaboration and proposal of implementation modalities of specific actions already included in the current AU-EU Innovation Agenda. In particular

⁴¹ [Towards a comprehensive Strategy with Africa JOIN\(2020\) 4 final.](https://data.consilium.europa.eu/doc/document/ST-14126-2021-INIT/en/pdf)
⁴² <https://data.consilium.europa.eu/doc/document/ST-14126-2021-INIT/en/pdf>
⁴³ <https://data.consilium.europa.eu/doc/document/ST-12301-2021-INIT/en/pdf>

and in practice, this action would enable the attainment of several short-term actions foreseen in the working document of the Innovation Agenda for two thematic areas (e.g. “Cross-cutting issues” and “Capacities for science”), aiming to:

- o Foster the establishment of links and networks among stakeholders across the innovation value chains, from generation of ideas to development and implementation of innovations, including private and public sectors, higher education and research organisations, financial institutions and civil society organisations;
 - o Involve citizens in the innovation ecosystems, to improve societal uptake of innovation outputs, and valorise creative and collective intelligence, ensuring also gender equality and active participation of youths;
 - o Strengthen coordination and cooperation between AU and EU innovation programmes and various implementing institutions, ensuring knowledge transfer, capacity building and mobility opportunities, consistent with the socio-economic needs of the concerned AU and EU countries or regions.
- Facilitate, conceptually and logistically, the organisation of annual or bi-annual meetings with key innovation stakeholders from the EU and the AU. By doing so, provide a forum for discussion and planning of the implementation of other short-, medium- and long-term actions of the AU-EU Innovation Agenda;
 - Provide further de-risking support to Eureka-funded small and medium sized-enterprises (SMEs), that have previously benefitted from Viability Assessment Projects (VAPs) under Eureka’s Innowwide, by shortening the time-to-market of their innovative solutions and enhancing the uptake of innovations in European and African countries.

Scope: Target group(s): Networks of start-ups, innovators, incubators, accelerators, academia, research and technology organisations (public and private sector), think tanks, non-governmental organisations (NGOs), civil society organisations, private and financial actors.

With the objective of guaranteeing a multidisciplinary approach, the selected consortium should be composed of diverse stakeholders (e.g. networks of start-ups, innovators, incubators, accelerators, academia, research and technology organisations, think tanks, NGOs, private and financial sectors, the European Institute of Innovation and Technology's (EIT) Knowledge and Innovation Communities (KICs), etc.).

Following the end of the project, this platform is expected to continue operations without funding from Horizon Europe. Therefore, the development of a sustainability plan is requested.

HORIZON-EIE-2024-CONNECT-01-03: Expanding Academia-Enterprise Collaborations

Specific conditions

*Horizon Europe - Work Programme 2023-2024
European Innovation Ecosystems (EIE)*

<i>Expected EU contribution per project</i>	The Commission estimates that an EU contribution of around EUR 0.50 million would allow these outcomes to be addressed appropriately. Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.
<i>Indicative budget</i>	The total indicative budget for the topic is EUR 4.00 million.
<i>Type of Action</i>	Coordination and Support Actions
<i>Eligibility conditions</i>	<p>The conditions are described in General Annex B. The following exceptions apply:</p> <p>The following additional eligibility criteria apply:</p> <p>This action requires the participation of at least three (3) independent legal entities, of which at least one (1) is established in a 'moderate' or 'emerging' innovator region and at least one (1) in a 'strong' or 'innovation leader' innovator region.</p> <p>The Regional Innovation Scoreboard is taken as a reference, and in the case of entities representing national authorities, the European Innovation Scoreboard. The applicants must use as a reference the latest version of the documents mentioned above at the time of the call closure. Associated Countries which are not included in the European Innovation Scoreboard and are ranked below 25 on the latest Global Innovation Index are considered as 'moderate' or 'emerging' innovators. In cases of Associated Countries not included in any of the previously mentioned references, the participation rank of the country in the Horizon Europe programme (H2020 country profile) will be taken as a reference and countries ranked below the average will be considered as 'moderate' or 'emerging' innovators.</p> <p>The consortium must include at least one (1) educational institution and at least one (1) representative of the private sector (for-profit entity).</p>
<i>Legal and financial set-up of the Grant Agreements</i>	<p>The rules are described in General Annex G. The following exceptions apply:</p> <p>Eligible costs will take the form of a lump sum as defined in the Decision of 7 July 2021 authorising the use of lump sum contributions under the Horizon Europe Programme – the Framework Programme for Research and Innovation (2021-2027) – and in actions under the Research and Training Programme of the European Atomic Energy Community (2021-2025).⁴⁴</p>

⁴⁴ This [decision](#) is available on the Funding and Tenders Portal, in the reference documents section for Horizon Europe, under 'Simplified costs decisions' or through this link: https://ec.europa.eu/info/funding-tenders/opportunities/docs/2021-2027/horizon/guidance/lis-decision_he_en.pdf

Expected Outcome: Projects results are expected to contribute to some of the following expected outcomes:

- Improved flows of knowledge, skills, and talents between innovation ecosystems at various levels of development;
- Improved skills to increase innovation potential, inter-sectoral mobility, and market uptake of new technologies. Skills which are necessary and responsive to innovation and labour market needs on digital, green, and entrepreneurial skills, having a strong focus on service orientation, as well as diverse advanced knowledge on open science, data management, and Intellectual Property Rights (IPR) in the field of deep tech⁴⁵ to collaborate with actors of innovation ecosystems, value chains, local business, Small and Medium-sized Enterprises (SMEs), start-ups at European Union (EU) level, and with global industry;
- Improved skills that would also response to growing needs of high quality remote testing, validation and up-scaling of innovations delivered by research and technology infrastructures across the EU;
- Improved quality of entrepreneurial education and local talents equipped with skills to support business acceleration and digitalisation⁴⁶;
- Enhanced entrepreneurial activity in developing innovation ecosystems and its scale up and interconnectedness across the EU;
- Increased engagement of business students with research institutions and their respective tech transfer offices to examine the invention portfolio and study the process and potentials for spin-off creation;
- Increased youth (self) employability and gender balance in collaborations;
- Improved integration of Higher Education Institutions, vocational schools, and similar organisations into Europe's innovation ecosystem;
- Raised awareness of diverse business cultures and opportunities across sectors and/or geographies (e.g. urban and rural).

Scope: *Target group(s): Vocational schools, higher education establishments, public authorities in the field of education and employment, innovation agencies, SMEs, deep tech companies, the European Innovation Council (EIC) and the European Institute of Innovation and Technology (EIT) start-ups and industry, research performing organisations, knowledge and technology transfer offices and associations, students and researchers.*

⁴⁵ Deep tech is technology that is based on cutting-edge scientific advances and discoveries and is characterised by the need to stay at the technological forefront by constant interaction with new ideas and results from the lab. Deep tech is distinct from 'high tech' which tends to refer only to R&D intensity

⁴⁶ See [Entrepreneurship Competence Framework](#) for more information on entrepreneurial competences.

The transforming economy and rapid development of technology have changed employment conditions and the set of skills needed to grow one's own business. More than ever, educational institutions should work hand in hand with the business sector to prepare students for a rapidly changing working environment by nurturing their entrepreneurial competences. Compared to dense areas around economic centres, the entrepreneurial skills and activity gap is bigger in peripheral and rural areas with lower and less diverse economic activity, confirming the importance of closely interlinked ecosystems for sustaining entrepreneurial activity and employment rates.

The action should enhance entrepreneurial skills of youth in 'moderate' and 'emerging' innovation ecosystems⁴⁷ by supporting entrepreneurial education through exchange programmes designed in close collaboration with the private sector and business acceleration entities.

The proposals should leverage best practices of the private and public sector in the EU's well performing innovation hubs and enhance collaboration between businesses with educational institutions. Only by fostering local talents, including female talents, and providing them with knowledge and opportunities to contribute to the local private sector or develop their own businesses, local innovation ecosystems can expand based on sustainable and inclusive growth. The proposals should valorise high levels of technical skills in developing innovation ecosystems with hands-on knowledge and experiences in business management and international scale-up process.

The action supports co-designed programmes of activities, of at least two (2) study years, proposed jointly by educational institutions from 'emerging' and 'moderate' innovation ecosystems and the private sector from innovation hubs ('strong innovators' and 'innovation leaders'), to nurture entrepreneurial skills by activities, for example:

- engagement of business experts into the implementation of educational programmes;
- engagement of students and graduates from various disciplines and departments into the respective companies' structures, and engagement of educational staff in companies' business processes, both with a target of gender-balanced participation;
- organisation of co-ideation challenges, where students can propose innovative solutions in the field of partners' expertise and are provided with resources and support to develop the product and its business development strategy;
- creation of synergies between students, deep tech women entrepreneurs, innovators, education institutes, research performing organisations, universities and business partners,

⁴⁷ References: the [Regional Innovation Scoreboard](#), and in the case of entities representing national authorities, the [European Innovation Scoreboard](#). Associated Countries which are not included in the European Innovation Scoreboard and are ranked below 25 on the [Global Innovation Index](#) are considered as 'moderate' or 'emerging' innovators. In cases of Associated Countries not included in any of the previously mentioned references, the participation rank of the country in the Horizon Europe programme ([H2020 country profile](#)) will be taken as a reference and countries ranked below the average will be considered as 'moderate' or 'emerging' innovators.

locally, at EU level, and globally targeting the creation of networks and community of practices in the field of deep tech to stimulate the market uptake of results and new technologies and co-creation of them.

To ensure that the impact of the action goes beyond consortium members and their respective countries, it is encouraged that the selected consortia work closely with innovation agencies from their respective territories and beyond, and seek synergies with relevant EU initiatives in the field of university-business cooperation, such as knowledge and innovation alliances under the Erasmus+ programme or the EIT Knowledge Innovation Communities (KICs) to allow for complementarities and possible use of already existing EIT KICs' knowledge, expertise, networks, communities or platforms such as those developed under the EIT Initiative on Innovation Capacity Building for Higher Education⁴⁸ that focuses on strengthening partnerships between higher education and businesses including developing innovation and business support services.

Call - Interconnected Innovation Ecosystems (2024.2)

HORIZON-EIE-2024-CONNECT-02

Conditions for the Call

Indicative budget(s)⁴⁹

Topics	Type of Action	Budgets (EUR million)	Expected EU contribution per project (EUR million) ⁵⁰	Indicative number of projects expected to be funded
		2024		
Opening: 06 Jun 2024 Deadline(s): 19 Sep 2024				
HORIZON-EIE-2024-CONNECT-02-01	COFUND	16.00	Around 2.00	8
HORIZON-EIE-2024-CONNECT-02-02	CSA	1.00	Around 0.10	10

⁴⁸ <https://eit.europa.eu/our-activities/opportunities/pilot-call-hei-initiative-innovation-capacity-building-higher-education>

⁴⁹ The Director-General responsible for the call may decide to open the call up to one month prior to or after the envisaged date(s) of opening.

The Director-General responsible may delay the deadline(s) by up to two months.

All deadlines are at 17.00.00 Brussels local time.

The budget amounts are subject to the availability of the appropriations provided for in the general budget of the Union for years 2023 and 2024.

⁵⁰ Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.

**Horizon Europe - Work Programme 2023-2024
European Innovation Ecosystems (EIE)**

Overall indicative budget		17.00		
---------------------------	--	-------	--	--

General conditions relating to this call	
<i>Admissibility conditions</i>	The conditions are described in General Annex A.
<i>Eligibility conditions</i>	The conditions are described in General Annex B.
<i>Financial and operational capacity and exclusion</i>	The criteria are described in General Annex C.
<i>Award criteria</i>	The criteria are described in General Annex D.
<i>Documents</i>	The documents are described in General Annex E.
<i>Procedure</i>	The procedure is described in General Annex F.
<i>Legal and financial set-up of the Grant Agreements</i>	The rules are described in General Annex G.

Proposals are invited against the following topic(s):

HORIZON-EIE-2024-CONNECT-02-01: Implementing co-funded action plans for connected regional innovation valleys

Specific conditions	
<i>Expected EU contribution per project</i>	The Commission estimates that an EU contribution of around EUR 2.00 million would allow these outcomes to be addressed appropriately. Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.
<i>Indicative budget</i>	The total indicative budget for the topic is EUR 16.00 million.
<i>Type of Action</i>	Programme Co-fund Action
<i>Eligibility conditions</i>	The conditions are described in General Annex B. The following exceptions apply: The following additional eligibility criteria apply: This action requires the participation of at least three (3) national or regional authorities, of which at least one (1) is representing a

	<p>'moderate' or 'emerging' innovator region and at least one (1) is representing a 'strong' or 'innovation leader' innovator region.</p> <p>The Regional Innovation Scoreboard is taken as a reference, and in the case of entities representing national authorities, the European Innovation Scoreboard. The applicants must use as a reference the latest version of the documents mentioned above at the time of the call closure. Associated Countries which are not included in the European Innovation Scoreboard and are ranked below 25 on the latest Global Innovation Index are considered as 'moderate' or 'emerging' innovators. In cases of Associated Countries not included in any of the previously mentioned references, the participation rank of the country in the Horizon Europe programme (H2020 country profile) will be taken as a reference and countries ranked below the average will be considered as 'moderate' or 'emerging' innovators.</p>
<p><i>Legal and financial set-up of the Grant Agreements</i></p>	<p>The rules are described in General Annex G. The following exceptions apply:</p> <p>Grants award under this topic will have to submit the following deliverable(s):</p> <p>Annual work plans subject to approval by the Commission. For the first year the annual work plan needs to be submitted together with the respective proposal.</p> <p>The funding rate is 50% of the eligible costs as the beneficiaries will carry out the proposed activities mainly themselves and the activities will not include financial support to third parties.</p> <p>The consortium must provide a letter of intent at the moment of submission of the proposal indicating the source the other 50% of funding.</p>

Expected Outcome: Projects results are expected to contribute to all of the following expected outcomes:

- Open⁵¹, efficient, inclusive and interconnected innovation ecosystems across the European Union (EU) in line with the new European Innovation Agenda⁵², building on their diversities and complementarities, enhancing the joint definition of visions and strategies

⁵¹ The notion of “openness” can be defined as “the pooling of knowledge for innovative purposes where the contributors have access to the inputs of others and cannot exert exclusive rights over the resultant innovation” (Chesbrough, H., & Appleyard, M. 2007. [Open Innovation and Strategy](#). California Management Review, 50(1): 57–76).

⁵² [A New European Innovation Agenda, COM\(2022\) 332 final](#)

involving actors from across the quadruple helix⁵³, encouraging the alignment of their innovation agendas based notably on their respective national/regional smart specialisation strategies, and strengthening their efficiency and potential to innovate;

- Enhanced synergies, complementarities and cooperation among all European innovation ecosystems around strategic areas, technologies and challenges of joint and common European interest, particularly in line with smart specialisation strategies, creation of common knowledge assets within regional innovation valleys, and support to their cross-border connectedness;
- Increased innovation capabilities in Member States and Associated Countries, allowing innovators to bring their ideas to the market and enable innovations to be scaled up at EU level, and facilitating the link with the private sector and other research and innovator actors;
- Better links between innovation 'leaders' and 'strong' innovators with 'moderate' and 'emerging' innovators across the EU and Associated Countries⁵⁴;
- More innovation co-investments, fostering other funding leverages, including European, national or regional public funds and/or other private funds, to complement Horizon Europe support;
- Increased participation of all innovation ecosystems actors across EU territories in technology and industrial value chains (existing and emerging ones) relevant to the EU twin green and digital transition to achieve broader sustainability and the EU's strategic autonomy.

Scope: Target group(s): National and/or regional innovation authorities.

The aim of this topic is to foster the creation of efficient, open, inclusive and interconnected European innovation ecosystems in line with the new European Innovation Agenda⁵⁵, notably in technological areas (including deep tech⁵⁶) that will be critical for EU value chains contributing to the twin green and digital transition and a resilient society.

The topic will support strategically oriented long-term programmes of activities (action plans) to enable authorities in charge of public national, regional, or local innovation policies and

⁵³ A model of cooperation between industry, academia, civil society and public authorities, with a strong emphasis on citizens and their needs.

⁵⁴ References: the [Regional Innovation Scoreboard](#), and in the case of entities representing national authorities, the [European Innovation Scoreboard](#). Associated Countries which are not included in the European Innovation Scoreboard and are ranked below 25 on the [Global Innovation Index](#) are considered as 'moderate' or 'emerging' innovators. In cases of Associated Countries not included in any of the previously mentioned references, the participation rank of the country in the Horizon Europe programme ([H2020 country profile](#)) will be taken as a reference and countries ranked below the average will be considered as 'moderate' or 'emerging' innovators.

⁵⁵ [A New European Innovation Agenda, COM\(2022\) 332 final.](#)

⁵⁶ Deep tech is technology that is based on cutting-edge scientific advances and discoveries and is characterised by the need to stay at the technological forefront by constant interaction with new ideas and results from the lab. Deep tech is distinct from 'high tech' which tends to refer only to R&D intensity.

programmes, with the participation of the private sector and research and innovation actors, to implement joint activities towards innovation development and deployment, aimed at tackling challenges at EU, national, regional, and local level.

The applicants are encouraged to consider a project duration of at least five (5) years and proposals should:

- Present the applicants' respective commitment to enhance the coordination and directionality of their research and innovation (R&I) investment and policies and their joint strategic visions and their proposed joint innovation programme of activities (action plans, including 3-4 interregional innovation projects, including in depth tech innovation, linked to key EU priorities); during the proposal submission the participants should have already reached an agreement on what they want to achieve, in order to be able to present concrete action plans; the plans can be further detailed on an annual basis during the implementation of the project;
- Describe the activities necessary, the process that will be followed, and the assets that will be mobilised; activities should be open, clear, realistic, impact-oriented and ensure:
 - o Participation of private actors, either for the joint implementation of proposed activities, and/or their possible co-funding; for example, via links and cooperation with innovative SMEs, start-ups, industry, private entities supporting innovation and innovators, including clusters, associations, as well as investors and foundations;
 - o Inclusiveness and diversity by expanding to territories that are less advanced in innovation deployment ('moderate' and 'emerging' innovators⁵⁷) and with the involvement of all innovation actors, especially those that are currently less active or missing in the innovation ecosystems (e.g. investors, foundations, public and private buyers, social innovators, civil society organisations including non-governmental organisations, individual innovators, rural actors, as well as women-led start-ups and SMEs);
 - o Complementarity and synergies with other funds (EU, public and/or private) and innovation-related strategies/policies/programmes/plans at national and/or regional level, including their smart specialisation strategies, Partnerships for Regional Innovation⁵⁸, start-up villages⁵⁹, as well as other relevant programmes (e.g. EIT/KICs, Enterprise Europe Network (EEN)); applicants should outline the scope for synergies and/or additional funding, in particular where this makes the projects more ambitious or increases their impact and expected results.

⁵⁷ References: [Regional Innovation Scoreboard \(RIS\)](#), [European Innovation Scoreboard \(EIS\)](#), [Global Innovation Index \(GII\)](#).

⁵⁸ <https://s3platform.jrc.ec.europa.eu/pri>

⁵⁹ <https://s3platform.jrc.ec.europa.eu/en/w/the-european-startup-village-forum-call-for-pledges>

- Explain the need and the reasons for selecting the proposed programme of activities that should be scalable at European level and demonstrate their strong EU added value; the proposed plan:
 - o Should include core activities, for example:
 - Networking and coordination structures and tools to facilitate innovation development and access to and sharing of best practices, resources, talents, markets, expertise, services and knowledge, including open and collaborative knowledge bases and common knowledge assets (methods, data, processes);
 - Facilitate interconnections between innovation hubs/ local pockets of excellence; market analysis, development and activities towards better access to new markets and finance for innovative SMEs and start-ups;
 - Training and skills development; interconnection of open innovation infrastructures; supportive activities towards scale up, exploitation and dissemination of innovative solutions;
 - Joint public procurement initiatives;
 - Social innovators' and civil society integration, as interlocutors for society and important inputs to the development of innovations and promotion of gender equality and diversity.
 - o May include additional joint activities non-eligible for co-funding with Horizon Europe budget, but in line with the expected outcomes of the topic; the budget of these activities however will not be considered for the final EU contribution.
- Explain the reasons for selecting the proposed strategic areas of cooperation, and how this cooperation will improve the efficiency and performance of the EU's innovation ecosystems, fostering their interconnection and scale-up; the action plans may focus on a thematic/technological area, in line with smart specialisation strategies, and Horizon Europe missions, and innovation priorities of common interest and EU strategic priorities, including climate, digital and social transitions, and strategic autonomy, and should pay attention to gender equality objectives⁶⁰; the potential for growth and competitiveness foreseen in the targeted sector and/or expected impact in EU challenge(s) through the proposed cooperation should be clarified in the proposal;
- Present how the consortium plans to implement these joint activities; the topic will not co-fund financial support to third parties, however the applicants may consider including such activities in their action plan (as additional joint activities non-eligible for co-funding), to be funded by other sources (national and/or regional and/or local or private);

⁶⁰

See for instance the [Horizon Europe regulation](#) for horizontal gender equality principles, the [ERA policy agenda 2022-2024](#), and the [Gender Equality Strategy 2020-2025](#).

*Horizon Europe - Work Programme 2023-2024
European Innovation Ecosystems (EIE)*

- Include clear targets in terms of outcomes for the measures/activities underpinned by verifiable indicators (applicants may wish to refer to the Sustainable Development Goals, the EU taxonomy on sustainable finance, or other relevant policy frameworks);
- Ensure their long-term commitment towards engaging in the joint cooperation activities set up in the frame of their projects.

HORIZON-EIE-2024-CONNECT-02-02: Mutual learning and support scheme for national and regional innovation programmes

Specific conditions	
<i>Expected EU contribution per project</i>	The Commission estimates that an EU contribution of around EUR 0.10 million would allow these outcomes to be addressed appropriately. Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.
<i>Indicative budget</i>	The total indicative budget for the topic is EUR 1.00 million.
<i>Type of Action</i>	Coordination and Support Actions
<i>Eligibility conditions</i>	<p>The conditions are described in General Annex B. The following exceptions apply:</p> <p>The following additional eligibility criteria apply:</p> <p>This action requires the participation of at least three (3) independent legal entities, of which at least one (1) is established in a 'moderate' or 'emerging' innovator region and at least one (1) in a 'strong' or 'innovation leader' innovator region.</p> <p>The Regional Innovation Scoreboard is taken as a reference, and in the case of entities representing national authorities, the European Innovation Scoreboard. The applicants must use as a reference the latest version of the documents mentioned above at the time of the call closure. Associated Countries which are not included in the European Innovation Scoreboard and are ranked below 25 on the latest Global Innovation Index are considered as 'moderate' or 'emerging' innovators. In cases of Associated Countries not included in any of the previously mentioned references, the participation rank of the country in the Horizon Europe programme (H2020 country profile) will be taken as a reference and countries ranked below the average will be considered as 'moderate' or 'emerging' innovators.</p>
<i>Legal and financial set-up of</i>	The rules are described in General Annex G. The following exceptions apply:

<i>the Grant Agreements</i>	Eligible costs will take the form of a lump sum as defined in the Decision of 7 July 2021 authorising the use of lump sum contributions under the Horizon Europe Programme – the Framework Programme for Research and Innovation (2021-2027) – and in actions under the Research and Training Programme of the European Atomic Energy Community (2021-2025). ⁶¹ .
-----------------------------	--

Expected Outcome: Projects results are expected to contribute to all of the following expected outcomes:

- Reduced fragmentation of innovation ecosystems and national/regional start-up support schemes;
- Increased cooperation, learning, and exchange of knowledge between national and regional innovation support public authorities and agencies in order to ensure that their innovation funding schemes respond to the requirements of the Plug-in certification for step 2 of the European Innovation Council (EIC) Accelerator;
- Improved ongoing and/or set up of new national and regional innovation funding programmes whose criteria are fit to pass the certification for the Plug-in scheme;
- The use, requirements and access to the Plug-in scheme are well communicated to the innovation ecosystem stakeholders, particularly start-ups and Small and Medium-sized Enterprises (SMEs);
- A more homogeneous, equal, and aligned approach in the evaluation of projects under national and regional support schemes;
- Enhanced cooperation among national and regional public authorities and agencies and SMEs and start-ups, particularly between innovation [leaders!/'strong' innovators and 'moderate!/'emerging' innovator countries⁶²;
- Stable pipeline of high quality projects to the EIC Accelerator Step 2.

Scope: *Target group(s): national or regional innovation agencies or similar organisations, national and regional authorities in charge of management of innovation programmes, EIC Plug-in contact points.*

⁶¹ This [decision](#) is available on the Funding and Tenders Portal, in the reference documents section for Horizon Europe, under 'Simplified costs decisions' or through this link: https://ec.europa.eu/info/funding-tenders/opportunities/docs/2021-2027/horizon/guidance/ls-decision_he_en.pdf

⁶² References: the [Regional Innovation Scoreboard](#), and in the case of entities representing national authorities, the [European Innovation Scoreboard](#). Associated Countries which are not included in the European Innovation Scoreboard and are ranked below 25 on the [Global Innovation Index](#) are considered as 'moderate' or 'emerging' innovators. In cases of Associated Countries not included in any of the previously mentioned references, the participation rank of the country in the Horizon Europe programme ([H2020 country profile](#)) will be taken as a reference and countries ranked below the average will be considered as 'moderate' or 'emerging' innovators

Start-ups and SMEs are the primary source of innovation in the EU and globally. However, the fragmentation of innovation ecosystems and the lack of connectedness among public national and regional agencies and innovation support schemes appear to be one of the main bottlenecks towards ensuring sufficient support of the most promising start-up and scale-up companies in the EU.

Building on the outcomes of different INNOSUP actions on peer learning of innovation agencies⁶³, as well as the Horizon 2020 pilot action under the enhanced EIC Pilot Work Programme “Mutual learning and common tools and resources for national/regional schemes supporting innovation projects of start-ups and SMEs”, this action aims at bringing together public innovation authorities and agencies to increase the dialogue and networking towards the design and implementation of regional and national innovation funding programmes in line with the requirements of the Plug-in certification for step 2 of the EIC Accelerator. In line with previous activities supporting peer learning of innovation agencies, use of the 'Twinning+' methodology⁶⁴ is strongly encouraged in the context of this action, including the creation of a Design Options Paper (DOP) to guide the innovation agencies in translating and concretely implementing the identified good practices.

The pilot Plug-in scheme is a novelty under Horizon Europe and is a specific process applicable to the EIC Accelerator only. It applies to proposals that result from existing national or regional programmes and its specific modalities are outlined in the [EIC Work Programme 2022](#) Annex 5.

Under the 'Plug-in' scheme, applicants do not apply directly to the EIC Accelerator calls. Instead, a project review is carried out to assess the innovation or market deployment potential of an existing project at national or regional level to decide whether the project is suitable for support under the EIC Accelerator.

The first pilot results of a mapping of national and regional programmes by the European Commission in close cooperation with Member States has shown that although 31 out of 52 programmes submitted were certified, several programmes did not pass the certification and some Member States have not submitted any programme to the review at all. This action aims to assist Member States and Associated Countries to improve or create national and regional funding programmes that could qualify for certification under the Plug-in scheme of the EIC Accelerator. Applications from regional and national agencies from 'moderate' and 'emerging' innovator countries and regions are particularly encouraged.

The proposals are expected to include specific activities that will allow applicants to:

- Enhance the quality of support provided at national and regional levels to the most promising innovative start-ups and SMEs,

⁶³ Results summarised in the “[Handbook of service design for Innovation Agencies](#)”

⁶⁴ Further information and examples can be found in the “[Handbook of service design for Innovation Agencies](#).”

*Horizon Europe - Work Programme 2023-2024
European Innovation Ecosystems (EIE)*

- To improve or set up national and regional funding programmes that could qualify for certification under the Plug-in scheme of the EIC Accelerator,
- To share best practices in terms of design, functioning, operation, and monitoring of such programmes;
- To broaden access to information and communicate to the applicants (start-ups and SMEs) on the opportunities to access the national and regional funding programmes and have their chance to be selected under Plug-in scheme to apply to step 2 of the EIC Accelerator.

DRAFT

Destination: INNOVSMES - Partnership on Innovative SMEs

Small and medium-sized enterprises (SMEs) represent the backbone of the European economy. They represent 99.8% of all enterprises in the EU non-financial business sector and two thirds of employment. However, SMEs in Europe face obstacles to growth, expansion and scaling up, including lack of skills, administrative burden, and access to finance. Many lack capacity for innovation and struggle to enter international markets.

Greater cooperation with partners in Europe and beyond can help to address many of these issues. However, opportunities for bottom-up, international collaborations are limited. European SMEs can struggle to find support for their internationalisation efforts. At national level, support is often limited to collaboration among partners within the same Member State. Levels of investment to support internationalisation in European innovative SMEs vary and there is suboptimal co-ordination of national schemes. Overall, these issues weaken the resilience of the European innovation ecosystem.

The proposal for the topic under this destination should cover a specific niche that other EU, national and regional interventions do not address for the benefit of innovative SMEs in Europe: cooperation among European and/or international partners, with at least one innovative SME as the project leader. The proposed initiative would help innovative SMEs to increase their research and innovation (R&I) capacity and productivity and to become embedded in global value chains and new markets. It would achieve this by supporting innovative SMEs in developing products, processes and services through funding market-led, cross-border, R&I collaborative projects and providing accompanying measures. It would enable global collaboration and the commercialisation of new knowledge. It would thereby strengthen the overall resilience of the European innovation ecosystem.

In line with the Horizon Europe objectives⁶⁵ it aims to generate knowledge, support the access to and uptake of innovative solutions by SMEs (including to address global challenges), facilitate technological development, demonstration, knowledge and technology transfer, and strengthen deployment and exploitation of innovative solutions.

In line with Horizon Europe Strategic Planning, the partnership aims to contribute to global and European policies. In particular the strategic priorities of the European Commission with a special focus on the ‘European Green Deal’ and ‘An economy that works for people’ including the SME Strategy for a sustainable and digital Europe, as well actions towards tackling the COVID-19 crisis and the post-COVID era.

In line with the Global Approach to Research and Innovation⁶⁶ the partnership aims to facilitate the internationalisation of European SMEs by establishing win-win international innovation partnerships, such as networks of incubators and accelerators with countries that offer reciprocal openness to entrepreneurship and investment, promoting mobility of innovators in

⁶⁵ [Horizon Europe Regulation](#), Article.3.2.(b), (c).

⁶⁶ [COM\(2021\) 252 final](#).

both directions. The envisaged activities will build on tools developed and experience gained and by creating synergies with other supporting mechanisms.

Expected impact

The proposal for the topic under this destination should set out a credible pathway to contributing to the following expected impact:

To help European innovative SMEs to grow and successfully access European and international markets and to embed in global value chains by:

- Contributing to the the strategic priorities of the European Commission with a special focus on the ‘European Green Deal’ and ‘An economy that works for people’ including the SME Strategy for a sustainable and digital Europe, as well actions towards tackling the COVID-19 crisis and the post-COVID era.
- Strengthening the innovation performance, output, potential and resilience of the European innovation ecosystem;
- Addressing the productivity and internationalisation gap between innovative SMEs and large companies and aiming to improve SMEs’ global scale-up potential leading to increased employment and turnover;
- Leveraging investment for innovative SMEs.

The following call(s) in this work programme contribute to this destination:

Call	Budgets (EUR million)		Deadline(s)
	2023	2024

		2023	2024		
Opening: 11 Jan 2023 Deadline(s): 22 Mar 2023					
HORIZON-EIE-2023-INNOVSMES-01-01	COFUND	34.54	36.58	Around 71.116079	1
Overall indicative budget		34.54	36.58		

General conditions relating to this call	
<i>Admissibility conditions</i>	The conditions are described in General Annex A.
<i>Eligibility conditions</i>	The conditions are described in General Annex B.
<i>Financial and operational capacity and exclusion</i>	The criteria are described in General Annex C.
<i>Award criteria</i>	The criteria are described in General Annex D.

⁶⁷ The Director-General responsible for the call may decide to open the call up to one month prior to or after the envisaged date(s) of opening.
The Director-General responsible may delay the deadline(s) by up to two months.
All deadlines are at 17.00.00 Brussels local time.
The budget amounts are subject to the availability of the appropriations provided for in the general budget of the Union for years 2023 and 2024.

⁶⁸ Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.

**Horizon Europe - Work Programme 2023-2024
European Innovation Ecosystems (EIE)**

<i>Documents</i>	The documents are described in General Annex E.
<i>Procedure</i>	The procedure is described in General Annex F.
<i>Legal and financial set-up of the Grant Agreements</i>	The rules are described in General Annex G.

Proposals are invited against the following topic(s):

HORIZON-EIE-2023-INNOVSMES-01-01: European Partnership on Innovative SMEs

Specific conditions	
<i>Expected EU contribution per project</i>	The Commission estimates that an EU contribution of around EUR 71.116079 million would allow these outcomes to be addressed appropriately. Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.
<i>Indicative budget</i>	The total indicative budget for the topic is EUR 71.12 million.
<i>Type of Action</i>	Programme Co-fund Action
<i>Procedure</i>	The procedure is described in General Annex F. The following exceptions apply: The granting authority can fund a maximum of one project.
<i>Legal and financial set-up of the Grant Agreements</i>	The rules are described in General Annex G. The following exceptions apply: Beneficiaries may provide financial support to third parties (FSTP). The support to third parties can only be provided in the form of grants. Financial support provided by the participants to third parties is one of the primary activities of this action in order to be able to achieve its objectives. The EUR 60 000 threshold provided for in Article 204(a) of the Financial Regulation No 2018/1046 does not apply. The maximum amount of FSTP to be granted to an individual third party is EUR 25.000.000. This amount is justified since provision of FSTP is the primary activity of this action and it is based on the extensive experience under predecessors of this partnership. At least two thirds (67%) of the projects supported through FSTP must involve at least two beneficiaries from Member States or Associated Countries.

*Horizon Europe - Work Programme 2023-2024
European Innovation Ecosystems (EIE)*

	<p>The funding rate is 30 % of the eligible costs.</p> <p>The starting date of grants awarded under this topic may be as of the submission date of the application. Applicants must justify the need for a retroactive starting date in their application. Costs incurred from the starting date of the action may be considered eligible.</p>
<i>Total indicative budget</i>	<p>The total indicative budget for the topic is EUR 250 million committed in annual instalments over the 7 years, 2021-2027 (EUR 34,54 million from the 2023 budget and EUR 36,58 million from the 2024 budget).</p>

Expected Outcome: Projects results are expected to contribute to all of the following expected outcomes:

- Improved knowledge transfer in the European innovative Small and Medium-sized Enterprises (SMEs) ecosystem, through increased and sustained collaboration between SMEs, public research partners and academia;
- Mitigation of difficulties in access to finance for European innovative SMEs and thus contribute to enhanced growth and expansion of European innovative SMEs;
- Improved European innovative SME access to new international markets or value chains thus leading to improved market share and sales for European innovative SMEs increasing their employment capacity;
- Increase public research and innovation funding to European innovative SMEs, to spur more high quality collaborations and more innovative solutions;
- Pull together national efforts to spur internationalisation and collaboration in European innovative SMEs, avoiding unnecessary duplication leading to a simplified offer to beneficiaries, achieving a more balanced geographic participation, ensuring complementarity and improved innovation ecosystems across Europe;
- Identify and better exploit existing or emerging opportunities in the global markets and establish win-win international innovation partnerships, such as networks of incubators and accelerators with the help of the Innowide instrument and other existing support mechanisms.

Scope: This action is the continuation of the topic HORIZON-EIE-2021-INNOVSMES-01-01 to support the co-funded European Partnership on Innovative SMEs included in the European Innovation Ecosystems work programme 2021-2022.

The proposal should provide mainly two types of activities. Firstly, regular calls for proposals resulting in collaborative research and innovation activities. These activities should result in a faster time to market, de-risking investment, supporting business growth, contributing to European Union (EU) and global priorities and supporting access to markets and knowledge.

Secondly, through coordination and support activities, the creation of synergies between and synchronisation of national programmes, and a better cooperation and knowledge exchange between national intermediaries.

While collaborative research and innovation activities for internationalisation of European innovative SMEs exist to some extent at Member State and EU level the alignment of national programmes and more effective and efficient processes of intermediaries and funding bodies are not addressed in instruments and programmes other than the Eurostars 1 and 2 programmes, supported under previous framework programmes. The initiative should draw on the experiences, and build on the successes, of those predecessor programmes.

There is a clear added value and ‘selling point’ for the initiative to further address gaps towards a better alignment and increased focus on internationalisation. This reflects the definition of European Partnerships in the Horizon Europe regulation⁶⁹ as initiatives where the union and its partners ‘commit to jointly support the development and implementation of a programme of research and innovation activities, including those related to market, regulatory or policy uptake.’

The below list of specific activities, going beyond research and innovation activities, can therefore be implemented under the partnership and are anticipated as expected outputs:

- Support transnational near-market collaborative research and innovation addressing technological and societal challenges;
- Enhance SME readiness (absorptive capacities in all participating countries),
- Attract wide range of beneficiaries by country and SME type and age;
- Create synergies among national programmes by streamlining their execution;
- Enhance cooperation and knowledge exchange at level of national intermediaries.

The proposed initiative will help innovative SMEs to increase their research and innovation capacities and productivity and to become embedded in global value chains and new markets. It will achieve this by supporting innovative SMEs in developing products, processes and services through funding market-led, cross-border, research and innovation collaborative projects and providing accompanying measures. The initiative addresses collaboration in Europe and beyond, and the commercialisation of new knowledge. Thereby it will strengthen the overall resilience of the European innovation ecosystem.

The overall objective of the initiative is to implement a Co-funded European Partnership for Innovative SMEs to stimulate economic growth and job creation by enhancing the competitiveness of innovative SMEs while contributing to deliver a positive economic, societal and environmental impact in Europe and beyond.

⁶⁹ Definition as per Article 2(47) of the [Horizon Europe Regulation](#).

In order to address that objective, the initiative should:

- Enable innovative SMEs to develop all forms of innovation, including breakthrough innovation, and strengthen market deployment of innovative solutions;
- Foster the internationalisation of European innovative SMEs;
- Connect national programmes to unlock the potential of all partners.

Type and range of activities

A main activity would be to run calls for proposals, organise the evaluation process and enable collaborative cross-border research and innovation projects. Beyond providing funding to innovative SMEs for cross-border research and innovation (R&I) collaboration, they should include further promotion of the programme in underrepresented Member States, including but not limited to, through dissemination events, mutual learning seminars or roadshows.

The initiative should exploit synergies with cohesion policy funds and significantly support the widening aspect. In any case, links with regional smart specialisation strategies should be a priority.

Accompanying measures such as Innowwide should be included in the proposal.

Expected partner composition and geographical coverage

- National administrations and National Funding Bodies (NFBs).

The private sector and research actors would need to be mainly drawn from the activities of the national and/or regional funding organisations. The effort, networks and judgements of these organisations are key to initiate cross-border research collaborations, to help prepare applications and to fund successful participants. The success of the initiative depends largely on these organisations.

A dedicated implementation structure may notably support them through various activities and services such as to organise calls, manage funding, monitor payments and projects and implement dissemination events, roadshows, matchmaking events, webinars etc.

The initiative should have an extended geographical coverage beyond Member States and Associated Countries, and the potential to evolve towards a global programme under Horizon Europe, including through possible involvement of additional partners during the lifetime of the programme. Third countries are welcome to participate in the Partnership in line with the standard criteria related to co-funded partnerships in Horizon Europe. The initiative should promote the ambition towards more projects involving other partners than those in geographical proximity and the sufficient utilisation of the potential of the extended Eureka network.

Types and levels of contributions from partners

Proposals should mobilise the necessary financial resources from participating national (or regional) research programmes with a view to implementing joint calls for transnational proposals resulting in grants to third parties.

Member States are invited to maximise the financial support provided to innovative SMEs through increased national funding during the selection process.

International dimension

Proposals should focus on supporting international projects led by innovative SMEs. They should enable international cooperation, enabling small businesses to learn, combine and share expertise and benefit from working beyond national borders.

In line with the ambitions of the partnership to foster international collaboration and the provisions of the model grant agreement, projects involving one legal entity established in a Member State or Associated Country as beneficiary and one legal entity established in a non-associated third country as partner may be supported in the same manner as under Eurostars 2. As per Horizon Europe rules, projects with no participants from Member States or Associated Countries are not eligible for participation in the partnership. At least two thirds (67%) of the projects supported must involve at least two beneficiaries from Member States or Associated Countries.

Synergies

Focussing on helping European innovative SMEs to grow and successfully embed in international markets and value chains by developing methodologies and technologies, the partnership is expected to collaborate closely with other relevant European Partnerships, missions and the European Innovation Council in order to ensure coherence and complementarity of activities. Proposals must describe the methodology for their collaboration and the aims the project wants to achieve with this kind of collaboration.

Proposals should include only their commitments for the grant covered by the present work programme.

[The outcome of this action will result in an amendment of grant agreement 101055476 to increase its budget. This type of amendment is exceptional and will apply exclusively to co-funded European Partnerships.]

The Commission envisages to include new actions in its future work programmes to provide continued support to the partnership for the duration of Horizon Europe.

Other actions not subject to calls for proposals

1. EU Intellectual Property Helpdesk

In the European Union (EU), Small and Medium-sized Enterprises (SMEs), including start-ups, individual innovators, researchers, and European micro small and medium-sized enterprises (MSMEs) do not always have sufficient knowledge of how to best use Intellectual Property (IP)⁷⁰ to facilitate the exploitation of research results, and more generally to manage, disseminate and valorise technologies and other IP rights and assets. A smart use of IP will help EU creators and inventors to obtain adequate reward for their intellectual efforts. It enables also SMEs to appropriately commercialise and take advantage of their intellectual assets in the EU. It may thus increase the chances that the scaling up and exploitation will take place in the EU. It is instrumental in securing better margins, organising technology transfers and collaboration and attracting investors. It may thus boost the resilience of the European economy.

This action supports the better use of IP by SMEs in setting up an EU IP Helpdesk based on the experience of the previous initiatives, inspired by the activities of the existing one and possibly extending its scope. The IP Helpdesk should raise awareness on IP matters via a website, developed and conduct trainings including Massive Open Online Courses (MOOCs) as well as customised advice in relation to cross-border IP issues across the EU and developing an IP strategy. The IP Helpdesk should work seamlessly with the European Innovation Council (EIC) acceleration services, as well as selected other innovation ecosystem services. It should in particular coordinate the website offering with the European Union Intellectual Property Office (EUIPO), the European Patent Office (EPO) and the other EU funded IP support services (namely International IP Helpdesks and IP Scan) and implement promotional activities in coordination with the action Awareness raising on IP management for European research and innovation (R&I).

The IP Helpdesk should aim at the following:

- Improving EU SME's knowledge about IP showing specifically how to use IP as strategic and structuring element for business development;
- Supporting EU project applicants for IP issues that are relevant in cross-border research and commercial relationships supported by EU funds (IP rights management as to the results of common projects);
- Supporting the management, dissemination and/or valorisation of technologies and other intellectual assets. This involves the provision of guidance to enhance the capacity of SMEs (including start-ups and scale-ups) to compete internationally, the protection of their intangible assets timely and adequately, the examination of ways to leverage their intangible assets for investments and their support with proof of concept IP advice;

⁷⁰ On SME challenges with IP, see the joint European Patent Office (EPO)-European Union Intellectual Property Office (EUIPO) study "[Intellectual property rights and firm performance in the EU](#)".

- Increasing the participation of the target group(s): entrepreneurs, SMEs and start-ups (applicants, together with the universities), start-up hubs, universities (applicants), National Contact Points, Enterprise Europe Network partners, Chambers of commerce, professional associations, EIC coaches, Business accelerators (applicants providers) for all in particular by strengthening the linkages with local stakeholders in ‘moderate’ and ‘emerging’ innovator countries⁷¹ and peripheral European countries.
- Supporting the promotion of socially responsible IP practices, identifying areas of particular societal concern where non-exclusive, royalty-free licences on the IP resulting from EU-funded research could be granted for a limited time to innovators/SMEs;
- Supporting the identification of critical IP created through public funding and prevent it from leaving the EU without control and guarantees.

Form of Funding: Procurement

Type of Action: Public procurement

Indicative timetable: Fourth quarter of 2023

Indicative budget: EUR 4.00 million from the 2023 budget (EU IP Helpdesk)

2. Mapping of regulatory compliance advisory services and identification of gaps

Regulatory compliance oftentimes remains a hurdle for innovators and innovative enterprises to commercialize products and services, and to scale up internationally. Small and Medium-sized Enterprises (SMEs), startups, and innovators do not always have the necessary knowledge of relevant European Union (EU), national, regional, or local rules that might affect their products or services. Despite harmonisation efforts within the Single Market, innovators and ventures frequently run into a multitude of issues including difficulties in meeting requirements to sell goods or services, insufficient information about applicable rules, fragmentation of rules for cross-border (e-)commerce, and complex administrative procedures when planning expansion to the foreign markets. Enhanced regulatory compliance advisory services can remedy this situation and help innovators to navigate the EU's complex regulatory environment.

This action funds a study and mapping of existing regulatory compliance services across the EU, with the aim to identify existing gaps. In doing so, this action will serve as a basis for potential future actions to provide innovators, startups, and innovative enterprises with optimal support to better position and promote their products or services and to help create better connected support structures for innovators.

Form of Funding: Procurement

Type of Action: Public procurement

⁷¹ References: [European Innovation Scoreboard \(EIS\)](#), [Global Innovation Index \(GII\)](#).

Indicative timetable: Third quarter of 2023

Indicative budget: EUR 0.50 million from the 2023 budget (Regulatory compliance advisory services)

3. Towards a Pilot European Start-up Scoreboard

There is a growing need for better data collection and analysis with regards to start-ups, scale-ups and their ecosystems. Currently, there are some existing initiatives by both public and private organisations that track the development of the European Union's (EU) startup ecosystem more broadly; however, due to the use of diverging data and definitions, and a number of different methodologies, they are often incompatible and unable to provide a clear picture on the European start-up landscape.

Building on the outcomes of the feasibility study for developing a European Start-up Scoreboard⁷², this action aims at establishing a set of innovation ecosystem specific indicators supported by consistent sources of data to embrace the development of methodological approaches to track, analyse and model innovation ecosystems policies at regional, national and European level with a specific focus on start-ups. This action should establish a credible methodology to monitor and evaluate the quality and inclusion of start-up ecosystems. It should provide policy makers with insights regarding the short, medium, and longer-term effects and benefits of innovation ecosystems related policies and instruments targeting start-ups and pay particular attention to their efforts and contributions towards the green and the digital transition. The results should include definitions of the data collection methods linked to the proposed indicators that should rely more on microdata gathering improved linking to external databases.

This action should provide a basis for a European Start-up Scoreboard that will provide European, national and regional policymakers, innovation practitioners and all interested public with a solid, EU-wide analytical tool to help monitor, measure and benchmark the innovation performance of the EU's start-up ecosystem, including individual Member States and their regions, as well as EU's associated countries and other key international economic partners.

Form of Funding: Procurement

Type of Action: Public procurement

Indicative timetable: Fourth quarter of 2023

Indicative budget: EUR 0.50 million from the 2023 budget (Pilot European Start-up Scoreboard)

⁷² The feasibility study was carried out under Specific Contract No RTD/2021/SC/032 - LC-01864764 "Development of the European Innovation Scoreboard" implementing framework contract No 2018/RTD/A2/OP/PP-07001-2018 (Lot 2: Exploring, Documenting and Analysing R&I policy issues (EDAR)), whose results will be published.

4. Use of individual experts on assisting with the monitoring of actions (2023)

This action will support the use of appointed independent experts for the monitoring of running actions (grant agreement, grant decision, public procurement actions, financial instruments) funded under Horizon Europe and previous Framework Programmes and where appropriate include ethics checks, as well as compliance checks regarding the Gender Equality Plan eligibility criterion.

A special allowance will be paid to the experts appointed in their personal capacity who act independently and in the public interest.

Form of Funding: Other budget implementation instruments

Type of Action: Expert contract action

Indicative timetable: First quarter of 2023

Indicative budget: EUR 0.20 million from the 2023 budget (Monitoring)

5. Use of individual experts in support of the EIC FORUM support (2023)

The European Innovation Council (EIC) Forum fosters in an informal manner, enabling framework conditions and flows of information, knowledge, talent and best practices among actors of innovation ecosystems and the EIC, to fully harness the potential of innovation. The Forum acts as an interface between the sections of Pillar III of Horizon Europe, ensuring coordination between the EIC and the European Institute of Innovation and Technology (EIT), as well as with other relevant sections of Pillar I and II. By involving also other relevant Directorates Generals (DGs) from the Commission, the Forum aims at promoting a coherent and inclusive approach to the European Union's innovation ecosystems, by co-creating and co-designing policies and instruments.

Experts will provide intelligence in support of the work of the EIC Forum and/or its working groups. Their aim will be to gather new or more robust evidence and / or to produce analyses in support of policy discussions.

A special allowance of EUR 450 in the form of a daily unit cost for each full working day spent will be paid to the individual experts appointed in their personal capacity who act independently and in the public interest.

Form of Funding: Other budget implementation instruments

Type of Action: Expert contract action

Indicative timetable: First quarter of 2023

Indicative budget: EUR 0.30 million from the 2023 budget (EIC Forum Support (2023))

6. Use of individual experts on assisting with the monitoring of actions (2024)

This action will support the use of appointed independent experts for the monitoring of running actions (grant agreement, grant decision, public procurement actions, financial instruments) funded under Horizon Europe and previous Framework Programmes and where appropriate include ethics checks, as well as compliance checks regarding the Gender Equality Plan eligibility criterion.

A special allowance will be paid to the experts appointed in their personal capacity who act independently and in the public interest.

Form of Funding: Other budget implementation instruments

Type of Action: Expert contract action

Indicative timetable: First quarter of 2024

Indicative budget: EUR 0.20 million from the 2024 budget (Monitoring)

7. Use of individual experts in support of the EIC FORUM support (2024)

The European Innovation Council (EIC) Forum fosters in an informal manner, enabling framework conditions and flows of information, knowledge, talent and best practices among actors of innovation ecosystems and the EIC, to fully harness the potential of innovation. The Forum acts as an interface between the sections of Pillar III of Horizon Europe, ensuring coordination between the EIC and the European Institute of Innovation and Technology (EIT), as well as with other relevant sections of Pillar I and II. By involving also other relevant Directorates Generals (DGs) from the Commission, the Forum aims at promoting a coherent and inclusive approach to the European Union's innovation ecosystems, by co-creating and co-designing policies and instruments.

Experts will provide intelligence in support of the work of the EIC Forum and/or its working groups. Their aim will be to gather new or more robust evidence and / or to produce analyses in support of policy discussions.

A special allowance of EUR 450 in the form of a daily unit cost for each full working day spent will be paid to the individual experts appointed in their personal capacity who act independently and in the public interest.

Form of Funding: Other budget implementation instruments

Type of Action: Expert contract action

Indicative timetable: First quarter of 2024

Indicative budget: EUR 0.30 million from the 2024 budget (EIC Forum Support (2024))

8. Commission fee as EUREKA member (administrative costs)

This action will cover the Commission fee as a member of Eureka (administrative costs). This action will support coordination activities aimed at increasing complementarities and synergy between EUREKA and the Horizon Europe in areas of common interest.

EUREKA is an international network established in 1985 as an agreement between 18 countries to foster European competitiveness and integration and to encourage Research & Development cooperation. Since then, it expanded to include over 45 countries in Europe and beyond who share the same goals and have national funding available to organisations who apply through our programmes.

The European Union is a member of EUREKA and, as such, contributes to the budget of the EUREKA Secretariat.

Type of Action: Subscription action

Indicative timetable: First quarter of 2023 and first quarter of 2024

Indicative budget: EUR 0.50 million from the 2023 budget (EUREKA membership) and EUR 0.50 million from the 2024 budget (EUREKA membership)
